Expert care, close to home

Imaging tests help providers diagnose or rule out diseases, detect certain cancers early, detect abnormalities in the heart and other areas of the body, and guide the most effective treatments.

The hospital you choose for your imaging test makes a difference, whether you need a mammogram, CT, X-ray, MRI or other test. The experienced radiologists and technologists at Vandalia Health System hospitals have specialized training using the latest technology with expertise in interpreting imaging studies for the most accurate results.

Imaging services

VANDALIA HEALTH NORTH

Mon Health Medical Center

- X-ray
- CT
- PET CT
- Cardiac CT

Vandalia Health

About us

Vandalia Health was created when CAMC Health System and Mon Health System came together and continued to grow with the addition of Davis Health System, all dedicated to providing the highest quality care in communities throughout West Virginia and surrounding states. By sharing our expertise and resources, we're strengthening health care in our region while continuing to keep and attract the most skilled doctors, nurses and staff in our own communities.

With more than 13,000 employees, physicians and other health care professionals, we are proud to deliver expertise, innovation and state-of-the-art care with a shared vision to make quality care accessible and affordable to everyone who needs it.

Engage with us

We can help you find the right care. To find a provider or learn more about our services, visit VandaliaHealth.org.
